

The Music Files — add it to your website

Three simple ways to feature Málaga Live's weekly *The Music Files* on your site. Pick one — A, B or C. The content stays hosted on malagalivepulse.com, updates automatically every Monday, and keeps its branding — you only paste a link or a snippet.

A • Link

Add a text or button link that opens the current issue. Always resolves to the newest issue:

```
https://malagalivepulse.com/the-music-files/latest/
```

Example link: `<a href="https://malagalivepulse.com/the-music-files/latest/">The Music Files</a>`

Prefer the full archive (all issues)? Use <https://malagalivepulse.com/the-music-files/>

B • Embed inside your page (iframe)

Show The Music Files directly within one of your pages. Paste where you want it to appear:

```
<iframe src="https://malagalivepulse.com/the-music-files/latest/" title="The Music Files — Málaga Live" style="width:100%;max-width:820px;height:1200px;border:0;display:block;margin:0 auto" loading="lazy"></iframe>
```

C • Clickable logo badge (SVG)

Show the The Music Files logo and tagline as a clickable badge that opens the current issue:

```
<a href="https://malagalivepulse.com/the-music-files/latest/" target="_blank" rel="noopener">  </a>
```

The single SVG already contains both the wordmark and the tagline, so nothing else is needed.
